1. Demension:

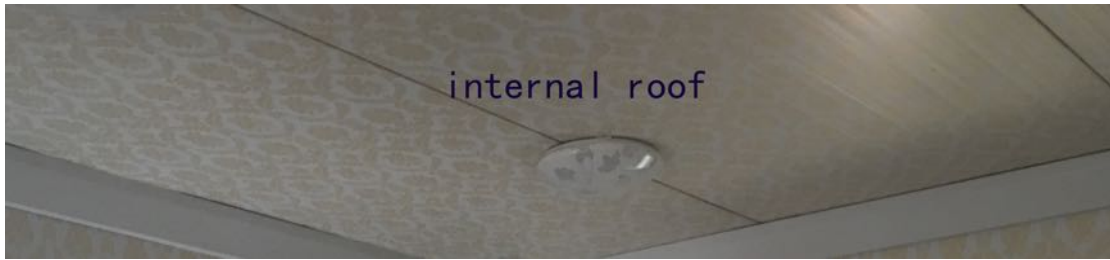

a,b,c is necessary

2. Panel Type:

It's for roof or for wall

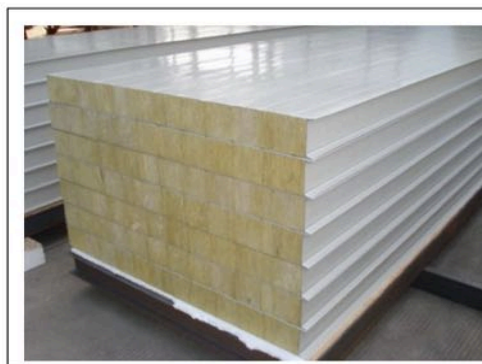

3. Connection Type

3.1 matchboard, normally used in modular house, tabernacle, clear room;

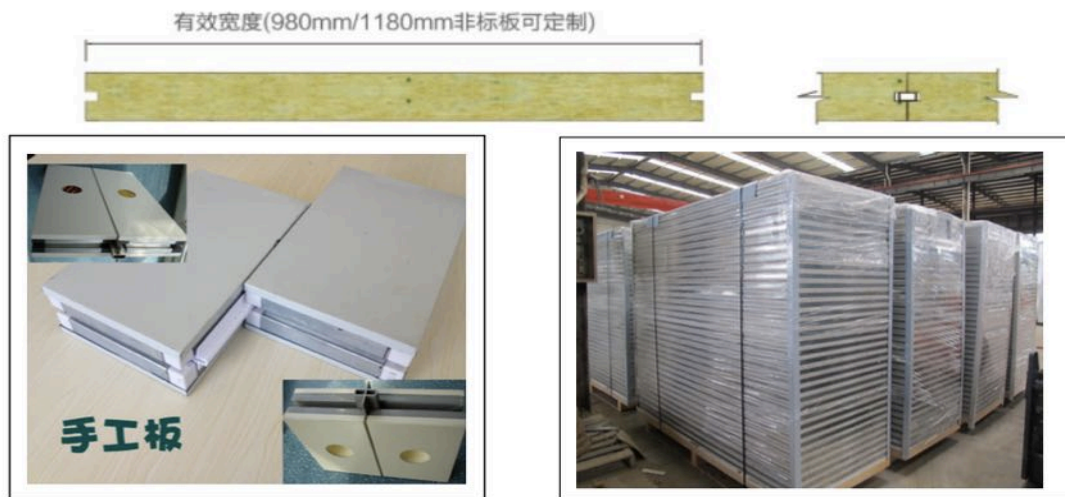

- ◆ advantage: price is cheaper and big facility
- ◆ disadvantage: obviously nails after installation, empty space between seam,

3.2 cross type connection, normally used in clear room wall and ceiling

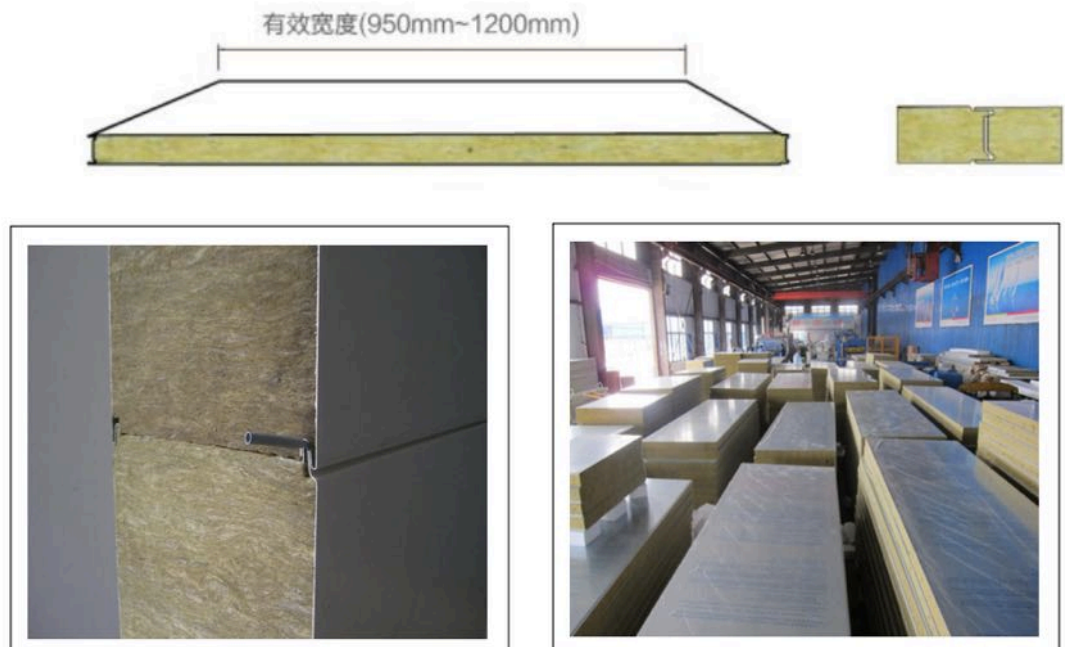

- ◆ advantage: good isolation performance

◆ disadvantage: lower facility with higher price, need nail when the length is long

3.3 Z type connection

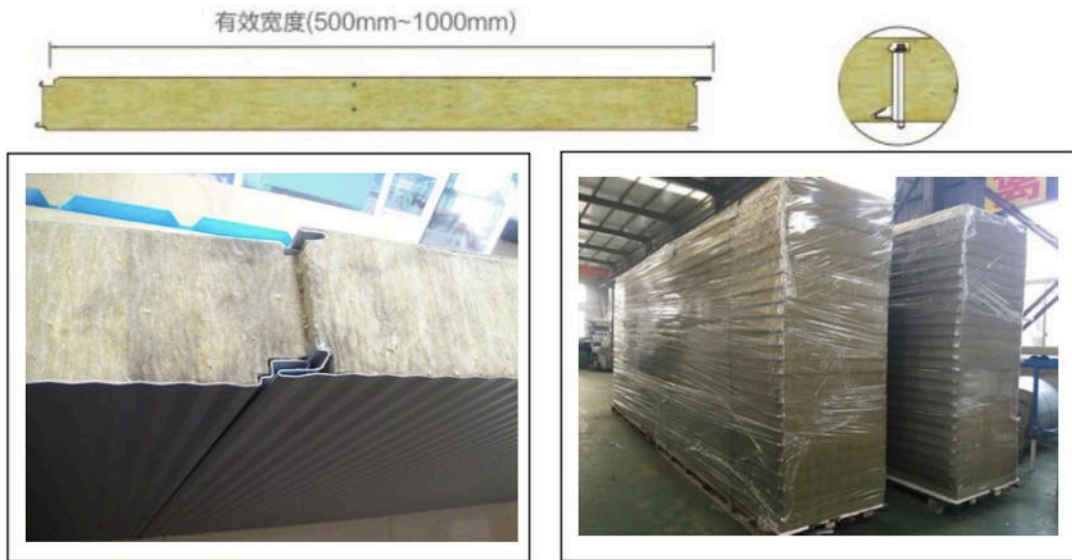

◆ advantage: seamless space between connection

3.4 Hidden type connection, normally used for outside wall panel

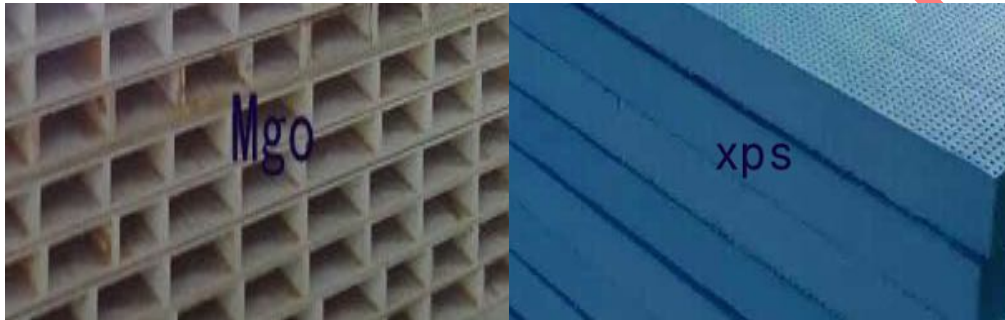

◆ advantage: neil hiddened, can't seen in front, good isolation performance, vertical and horizontal installtion is all available

◆ disadvantage: higher cost

4. Insulation
