

Model Number	Falcon Max (15.6 inch 4K LCD)
Usage Temperature	10°C~30°C
Relative Humidity	30%~90%
Storage Temperature	0°C~30°C
Input Voltage	AC100~240V /50~60Hz
Power Consumption	600W
Build Volume	345(L)×194(W)×400(H)mm
Layer Thickness	0.01mm~0.2mm
Printing Speed	20mm/H
Pixel Size	3840×2160(4K)
Resolution	90um
Support Function	One key automatic generate + editable(delete and add)
Slicing Software	ChiTu
File Format	.cbddlp
Operation System	Windows 7and up
Consumables	Basic rigid resin
Curing Wavelength	405nm
Light Source	LED
Resin Colors	Grey, Skin, White, Yellow, etc
Machine Dimensions	520(L)×480(W)×860(H)mm
Packaging Size	670(L)×620(W)×1000(H)mm
Gross Weight	60kg
Finished Product	Yes

#### Features:

1. Using stepper motor driver to drive stepper motor, Z-axis operation is more accurate and stable, with greater torque and not easy to lose steps;
2. The main board control relay is used to control the on and off of the light source to protect the electronic components on the main board.
3. Wide-angle LED light source, high efficiency, low heat generation and stable performance.
4. The interface adopts 3.5-inch true color touch screen, which is friendly and easy to use.
5. With large build size 345(L)×194(W)×400(H)mm, multiple models can be printed at the same time, arranged in an array, which improves efficiency and reduces costs.
6. The slicing software runs stably, reliably, and highlights the delicate features.
7. Passed CE, FCC, ROSH certification, the quality is guaranteed.
